Continuation She t (PTOL-303)

Application No. 09/502,664

Continuation of 2. NOTE: The amendments made to the claims introduces new matter as the claim prior to amendments recited "a method for isolating a polypetide involving contacting a modified FIAsH, modified by acylation with an amino acid, or a tautomer, anhydride or salt" and the amended claim recites "contacting a modified FIAsH or tautomer, anhydride or salt modified by acylation with a amino acid" the specification does not provide support for this method which raises new issues under 35 U.S.C. 112, first paragraphs an second paragraph because the claim also lacks antecedent basis. The previous office action suggested that applicant delete references t tautomer, anhydride or salt as a means of acylation to avoid the prior art.
